Summary

Information Technology graduate with hands-on experience working with databases, business systems, content management platforms, and structured information through freelance projects, internship, and academic work. Detail-oriented and proficient in reviewing, extracting, organizing, and managing data accurately, with strong analytical, research, and problem-solving skills. Adaptable, self-directed, and committed to producing accurate and well-organized outputs.

Professional Experience

Freelance
Full Stack Developer

Bula, Camarines Sur
September 2023 – Present

- **Simple Integrated Web & Mobile Movie Catalog System:** Helped building a cross-platform solution using CodeIgniter, Bootstrap, and React Native. Optimized backend logic to ensure real-time synchronization between web inputs and the mobile interface via RESTful APIs.
- **School Management System:** Developed a web application using PHP with role-based access control. Created dashboards for administrators and students to help make enrollment processes easier, manage event calendars, and update school announcements.
- **EnG Bakery Management System** Helped develop a management system for a bakery in Naga City, focusing on front-end development, business logic, and automated report generation and email sending for routine updates.
- **Content Management System for Volleywood:** Improved the WordPress-based CMS through user interface enhancements, workflow optimization, and interactive features, increasing usability and maintainability.

Internship
DOST ASOG Technology Business Incubator
Team Leader & Lead Programmer

Nabua, Camarines Sur
February 2026 – May 2026

- Led development of the official ASOG-TBI website using PHP, Tailwind CSS, CodeIgniter, Three.js, and GSAP.
- Participated daily in startup development training covering the end-to-end lifecycle, from ideation and market validation to business development, product development, and launch.
- Built a Content Management System (CMS) for managing blog content and incubatee profiles.
- Designed and developed an interactive 'Guess the Startup' web game for an ASOG-TBI event, successfully increasing participant interaction at the exhibit booth.

Education

CAMARINES SUR POLYTECHNIC COLLEGES
Bachelor of Science in Information Technology.

Nabua, Camarines Sur
August 2022 - July 2026

NABUA NATIONAL HIGH SCHOOL
Humanities and Social Studies.

Nabua, Camarines Sur
May 2022

Project

CAMARINES SUR POLYTECHNIC COLLEGES
Full Stack Web Developer (Capstone Project)

Nabua, Camarines Sur
June 2025 – January 2026

- Developed OptiCCS: An Integrated System for Monitoring and Managing Computer and Laboratory Equipment for the College of Computer Studies, a centralized laboratory management system using CodeIgniter (PHP) and MySQL that replaced manual paper-based inventory and monitoring workflows with automated report generation.
- Co-developed a real-time Python and Ratchet WebSocket monitoring agent to enable remote command execution, violation detection, and live screenshot streaming utilizing fixed-parameter quality tuning across multiple lab units.
